Research Interests

I am broadly interested in reinforcement learning, robotics, and cognitive science. My research vision is to enable *Trustworthy Machine Learning* for applications akin to everyday life (e.g., autonomous driving, household robots) by designing learning theories and algorithms for **robustly generalizing to challenging new environments**. I research from two perspectives: (1) proposing methods to enhance both generalization and robustness and (2) laying theoretical foundations for those two aspects.

Methods: Reinforcement Learning, Imitation Learning, Probabilistic Graphical Model, Game Theory
